

Support for the development of new antibiotic standards and monograph method modernizations

USP continues to increase the number of antibiotic-related monographs in the *United States Pharmacopeia-National Formulary (USP–NF)*. A complete listing of monographs under development can be found in USP’s *Pharmacopeial Forum (PF)*, a free bimonthly online journal where proposed monographs and general chapters are published for public review and comment before potentially becoming official. To learn more, visit <https://www.uspnf.com/pharmacopeial-forum>.

Your participation in our standards-setting process is vital to the development of relevant *USP–NF* monographs. USP seeks sponsors to help develop the following monographs:
